

Lesaffre Polska, a leading manufacturer of baker's yeast, bakery ingredients, feed materials and organic fertilisers, is committed to delivering products and services of the highest quality, whilst safeguarding the health and well-being of our employees, customers and the environment in which we operate.

To support this commitment, we have established and maintain an Integrated Management System aligned with the requirements of ISO 22000, GMP+, ISO 14001, ISO 27001 and ISO 50001. We are dedicated to its continual enhancement to ensure responsiveness to the evolving expectations of our customers, stakeholders and the communities we serve.

Food and Feed Safety and Quality

Lesaffre Polska is steadfast in its commitment to ensuring the safety, legality and quality of its products in accordance with ISO 22000, the FSSC 22000 certification scheme and the GMP+ standard. We operate comprehensive food and feed safety management systems incorporating hazard analysis, critical control points and full traceability, thereby ensuring the integrity and safety of our products throughout the value chain. We are committed to the prevention of food safety incidents, the continuous development of a strong food and feed safety culture across all levels of the organisation, and the maintenance of open and transparent communication with our stakeholders.

Environmental Management

Lesaffre Polska recognises its responsibility to protect the natural environment and to conduct its operations in a sustainable manner. In alignment with ISO 14001, we have implemented an Environmental Management System that enables us to identify, control and reduce our environmental impact. We are committed to the responsible use of natural resources, the reduction of waste and emissions, and the advancement of environmentally sustainable initiatives

Information Security

Lesaffre Polska places the highest importance on the confidentiality, integrity and availability of its information assets. In accordance with ISO 27001, we maintain an Information Security Management System designed to protect our data and systems against unauthorised access, misuse and cyber threats. We are committed to safeguarding the information entrusted to us by our customers and stakeholders.

Energy Management

Lesaffre Polska is committed to improving energy performance and reducing its carbon footprint. Through the implementation of an Energy Management System in line with ISO 50001, we systematically identify, monitor and enhance our energy efficiency. We actively pursue the adoption of energy-efficient technologies and promote responsible energy use across all operations.

Compliance with Kosher and Halal Requirements

Lesaffre Polska acknowledges the importance of meeting diverse dietary and cultural expectations. We maintain kosher and halal certification for the production of baker's yeast, ensuring full compliance with the specific requirements of these markets. We are committed to preserving the integrity of kosher- and halal-certified products throughout all stages of production and handling.

Sustainable Development

Lesaffre Polska is committed to embedding the principles of sustainable development within its business strategy. We endeavour to balance economic performance with environmental stewardship and social responsibility in order to create long-term value for our stakeholders. We actively support initiatives related to sustainable agriculture, renewable energy and the circular economy, contributing positively to society and the environment.

Through the effective implementation of this Integrated Management System Policy, Lesaffre Polska reaffirms its commitment to delivering safe and high-quality products, protecting the environment, securing information assets and promoting sustainable business practices.

This Policy is subject to regular review to ensure its continued relevance and suitability and is communicated internally and made publicly available via the organisation's website. The Policy is underpinned by annually defined, measurable objectives, the progress of which is systematically monitored and formally evaluated as part of the Management Review process.
